Pure EARTH Water

GRAVITY WATER SYSTEM

for Countertops

Stuff you need to know!

Santevia.com

Congratulations on the purchase of your Santevia™ Water System.

Your Santevia™ Water System revolutionizes tap water, creating clean, mineralized, and alkaline water that is healthy for you and tastes great!

SLOW IS GOOD

Your Santevia™ Pure EARTH Water System uses gravity to slowly percolate regular tap water through 8 transformational steps. Once complete, tap water is completely re-invigorated, energized, alkalized and re-mineralized, just as if from a natural pure water stream or aquifer.

Prepare: Do This First

STEP 1

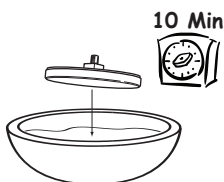

WATCH: Assembly Video at Santevia.com

STEP 2

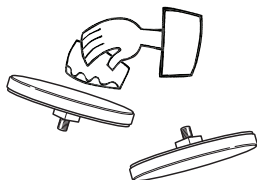

CHECK: ALL parts for missing pieces or damages.

STEP 3

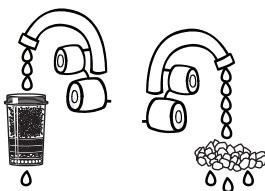

SAOK: Ceramic Pre-Filter in cool water for 10 minutes.

STEP 4

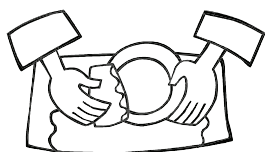

SCRUB: Ceramic Pre-Filter FIRMLY on both sides with scrub pad.

STEP 5

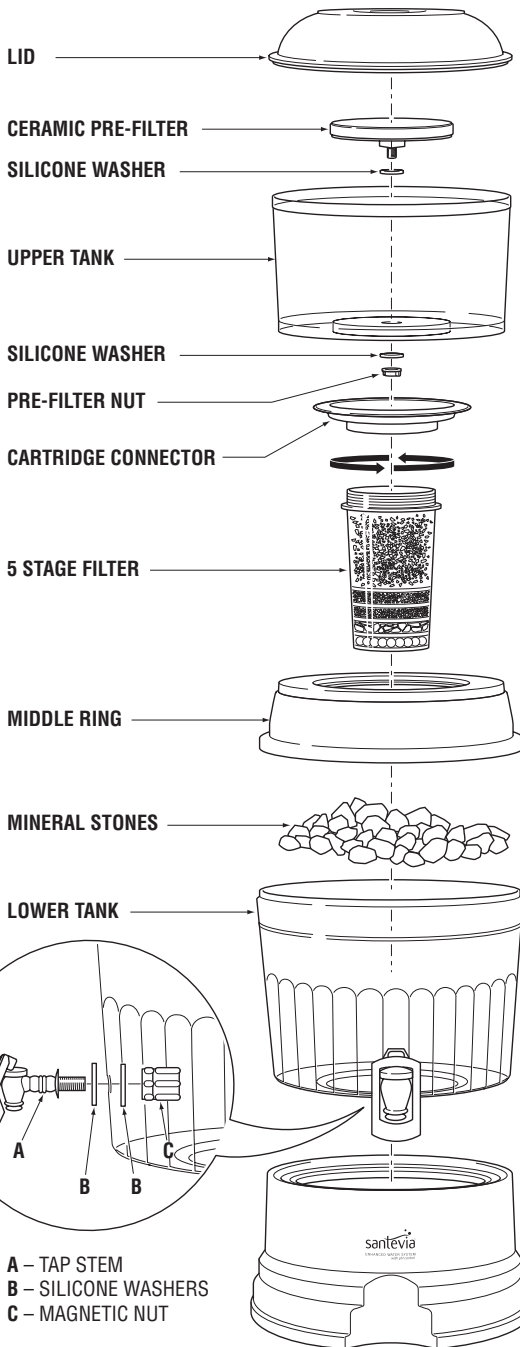

RINSE: 5 Stage Filter under COOL water until water coming out the bottom is clear. Rinse Mineral Stones thoroughly.

STEP 6

WASH: All additional parts & dry completely.

Assemble: Do This Next

STEP 1: Place Tap Stem through hole in Lower Tank with a Silicone Washer on each side. Tighten the Magnetic Nut on the inside.

STEP 2: Place the Lower Tank onto the Base.

STEP 3: Place cool and dry Mineral Stones in the Lower Tank.

STEP 4: Place the Middle Ring onto the Lower Tank.

STEP 5: Screw the 5 Stage Filter into the Cartridge Connector and set in Middle Ring.

STEP 6: Insert Ceramic Pre-Filter into the Upper Tank with a Silicone Washer on each side. Tighten the Pre-Filter Nut.

STEP 7: Place Lid on.

NOTICE

Run 2 Upper Tanks of water through the system before drinking. Discard that water and give it to your plants.

- A – TAP STEM
- B – SILICONE WASHERS
- C – MAGNETIC NUT

BASE

We have You Covered

WARRANTY POLICY

Santevia™ Water Systems warrants all components of your Santevia™ Gravity Water System to be free from defects in workmanship for one year from original date of purchase.

Any defective part will be replaced within this one year period.

DO NOT RETURN THE SYSTEM OR DEFECTIVE PART TO YOUR POINT OF PURCHASE.

CONTACT SANTEVIA™. We are usually able to ship replacement parts within 24 hours getting you back on track to great Santevia™ water quickly.

RETURNS POLICY

Contact Santevia™ to receive a Return Authorization BEFORE returning your Santevia™ Gravity Water System to the point of purchase.

FILTEREASE

FilterEase is a FREE email reminder of when to change filters. Register at Santevia.com.

DON'T FORGET!

The Santevia™ Water System must be used with biologically safe water. Use of the Santevia™ with unsafe water will void your warranty.

Good stuff to know

EXPECTATIONS

Why does my Santevia™ System take 4 hours to flow through?

Slow is good. Your Santevia™ Pure EARTH Water System uses gravity to slowly percolate regular tap water through 8 transformational steps. Once complete, tap water is completely re-invigorated, energized, alkalized and re-mineralized, just as if from a natural pure water stream or aquifer. You can produce up to 5 gallons of water per day. Ensure maximum flow through by cleaning your ceramic pre-filter each week, using a scrub pad. Fill the top tank after meals and at night, and you will have lots of Pure Santevia™ Earth Water for your family.

FILTER LIFE

When should the filters be changed?

5 Stage Central Filter every 6 months.
Ceramic Pre-Filter every 12 months with weekly cleaning.
Mineral Stones up to 5 years – don't forget to boil the rocks every 6 months to re-generate them.

PLASTIC

Is the Santevia™ plastic safe?

Polypropylene (PP) (#5) is used in the Santevia™ tanks. Our research has shown that PP5 does not leach any carcinogens or endocrine disrupters. One of our sources is the Green Guide: Safest Reusable Plastics for Holding Food and Water

** Polypropylene (PP) (#5) ... has not been shown to leach any carcinogens or endocrine disrupters. Readily available in reusable containers.*

LEAKS

My Santevia™ System is leaking – can you help?

Most leaks occur where the tap attaches to the lower tank and is because the tap is not tight enough.

- Check first to ensure silicone washers on the tap stem are on both sides of the lower tank.
- Empty the lower tank, reach inside, and tighten the magnetic nut until it is VERY snug.
- Fill the lower tank with tap water until the tap is submerged, then watch for leaks.
- If the leak persists, tighten the magnetic nut another quarter turn and test again.
- Reassemble your system. Watch the Santevia™ Assembly Video at Santevia.com
